WHO WE ARE

DESIGNnode

ARCHITECTURE | LAND & ENVIRONMENTAL PLANNING | INTERIOR DESIGN

Design Node is a company of multi-skilled South African professionals from different design, planning and environmental backgrounds.

Through this synergy of skills we offer a sustainable, integrated and holistic approach to small and large scale projects which span across the environmental planning, land development, architecture and interior design disciplines.

Through this synergy we are able to provide a one stop solution to clients with diverse needs. Design Node offers building and environmental solutions in the mining, waste, industrial, commercial and residential development sectors.

Our mission is to lead in integrated sustainable development planning, design, and environmental solutions through:

- Professionalism, integrity and ethical business dealings.
- Continuous innovation, agility to adapt to change, and improvement of solutions and services.
- Offering high quality service standards that focus on understanding the client's needs.

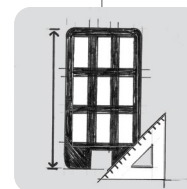

- Continued research and study in our academic fields.
- Applying our team's diverse knowledge and skills set to the advantage of our clients.
- Integrated development solutions on all our projects;

Design and planning that improves our local African context is at the core of the services we offer.

Our team's skills are tempered with our determination to deliver quality products and services consistently and sincerely within the financial and time constraints of the client's brief while also being sensitive to environmental and social issues. The company believes that the foundation for success is a dynamic focused, motivated, and dedicated team that is prepared to take ownership of concepts and turn ideas into reality.

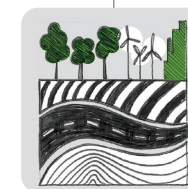

Our concern is not just for sustainable land development and conservation of the environment, but also for the upliftment of all South Africans.

Key to our success is that our award winning environmental, architects, interior and landscape professionals work closely together on each development concept. The multi-disciplinary input provided at DesignNode enables us to generate well planned, sustainable, innovative development solutions.
